DETAILED ACTION

Examiner's Statement for Reasons of Allowance

This Office Action is responsive to the amendment filed on 9/26/07. Claims 1 and 5-15 are pending. Claims 2-4 and 16-20 have been cancelled. According to the BPAI decision rendered on 8/28/01, the Examiner was affirmed in part; the rejection of claims 1-3 and 5-8 have been sustained and the rejection of claims 4 and 9-15 have not been sustained. Accordingly in Applicant's amendment filed on 9/26/07 Applicant has amended the claims to incorporate claim limitations that have not been sustained in the BPAI decision. Upon further search and consideration the former 35 USC 103 rejections have been overcome and no other prior art has been found that anticipates or suggests fairly Applicant's claimed invention.

The following is an examiner's statement of reasons for allowance: Applicant's claim limitations in independent claims 1 and 9 which have inter alia "a pair of diffuser plates...occlude at least a portion of the path" and "diffuser plate means for interrupting the rotary spray pattern", respectively, have not been suggested fairly by the closest prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Agee (US Patent No. 5,456,412) teaches a high pressure surface washing device employing a rotational spray arm, wheels, a pump, and an engine, however the spray arm of Agee is shown to spray a full 360° and thereby does not have an occluded spray path.

McCain (US Patent No. 3,332,221) teaches a rotary mower comprising wheels, an engine, and a distributor for delivering herbicide, insecticide, fertilizer, etc. to the ground via distributor ports 28.
